

# Introduction and identify the problem

One of the friends of mine would like to start up a dessert café in Malaysia. However, he has no idea on the positioning in the market and the competitor in the industry. Therefore, this report is to provide him and his potential investor with more insight and provide them with enough information in order for them to make decision.

The objectives of this projects as below:

- 1) Identify the dessert business opportunity in the potential area.
- 2) Identify the competitor and analyse the position of the competitor.

# Data

- The data will be collected through Foursquare API and the data collected will be around the potential startup location based in Malaysia.
- Neighbourhood name
- Latitude & longitude
- Name of the stores around the area
- Ratings of competitors
- Trending venues around the area.

# Methodology

- Foursquare API
- Pandas
- Folium

# Results

- 39 stores around the radius of 5KM
- 29 stores out of 39 stores are restaurant
- 10 stores are dessert store

# Results

---

There are no trending shops nearby the potential location

# Discussion of results

- Based on the findings, it is high in risk to start up the store in the location as there is a high competition in the potential area
- There is no trending venue around it.
- However, there are several opportunities in the area as the traffic is high and also many restaurants surrounding the potential location and consumers will usually go for dessert after a meal.
- Also, it is difficult to judge the popularity of the competitors as there is no rating given by the consumers.

# Recommendation

1. Move near to trending venue in order to take advantage of the traffic from the trending venue.
2. Provide a product with unique selling point to differentiate from the other competitors as the competition is high in the area.
3. Increase our web presence in location-based services such as Foursquare, Google etc.
  1. It is important to have a web presence as people will usually search online for shops with high rating and a strong web presence will drive higher traffic to the shops.

# Conclusion

- In short, other than the high concentration of the competitors in the area
- The location is promising as it provides with several opportunities e.i. many restaurants around the area, high traffic etc.
- There are some few places to improve which is to:
  - relocate to location nearby a trending venue if there is any in order to take advantage of the traffic,
  - improve web presence which will drive traffic to the shop
